

Quality Policy

We, at Depth Medicare, are committed to achieve full satisfaction of our customers, by assuring that our products and services are high and we produce high quality product with regards to safety, properties of use, efficacy and reliability and by ensuring that, our products and services are made available to them in due time.

We will achieve this by:

- ❖ Continual improvement in all areas.
- ❖ Selection of raw material.
- ❖ Effective process and technologies.

Meeting, manufacturing of quality active pharmaceutical products as per WHO and other international standards and monitoring the same periodically for the effectiveness.

We consider our human resources as one of the biggest assets. Our qualified and trained staff is provided constant training, to upgrade their knowledge and stay conversant with state-of-the-art technology.

We value motivation amongst our personnel as an important factor, to make them competent and quality conscious.

QUALITY SYSTEM CONCEPT

- ❖ The quality system typically applies to and interacts with all activities pertinent to the quality of a product.
- ❖ It involves all phases from initial identification to final satisfaction of requirements and customer expectations starting from marketing and market research, design/ specifications.
- ❖ Engineering and product development, production, inspection, testing, examination, packing and storage, sales and distribution, installation and operations of the machine, technical assistance and maintenance.
- ❖ Periodic self-inspection/ internal audit are conducted as per defined planner by team, comprising of cross- functional departments or external auditor to review and ensure effective implementation of quality system and cGMP compliance.
- ❖ Self-inspection and internal audits finding are recorded and corrective measure are taken for compliance. Records of self-inspection and audit are maintained

OPERATIONS OR ACTIVITY SITE:
